## Unleash the Miracle of Innate Healing & Neurogenesis by Naturally Restoring Afferent-Efferent Inner Physician Reciprocity

**Afferent Vagus regeneration exceeds stem cell regeneration tenfold. Find Out Why Your Patients Plateau or Don't Respond to Treatments and How to Get Fast, Permanent and Life-Changing Results by addressing CORE physiological issues**

Discover the latest breakthrough discoveries in Quantum Medicine™ that reveal the answers to the hidden and underlying causes of your most common and most challenging clinical problems, such as...

- **Neuro-Immune Dysregulation** – Learn why and how afferent under activity at the celiac plexus disrupts the immune balance of TH-1 and TH-2 cytokines to induce a path of never-ending destructive inflammation and THIS IS THE #1 CAUSE OF INFLAMMATION and it is 85-90% greater than Cox-2 or 5-Lox - Omega inflammation.
- **Blocked Lymphatic Drainage** chokes off nourishment to organs and allows toxins to impregnate deep in the nervous system and lymph nodes causing immunosuppression.
- **Man-Made Chemicals with Positive Ionic Toxicity (PIT)** causes ion deregulation and induces excessive efferent neuron activity that revs up immune cytokine inflammation. PITs are from increasing worldwide pollution and ALL synthetic man-made chemicals (vitamins, chelated amino acids, pharmaceuticals, nutraceuticals, etc) and cause stagnant deep lymphatic channel toxicity, non-stop inflammation, oxidative stress and more! PITs cause stubborn biofilm infections made up of yeast, fungi, bacteria and parasites that only get stronger with anti-infective herbals, propolis, allicin, oregano colloidal silver, and RIFE or LLLT treatments unless PITs are detoxified properly.
- **Maldigestion & Deficient Bile Syndrome (DBS)** - low afferent function and excessive efferent function causes a deficiency in bile production that lies at the core of chronic illness. Malnourishment always involves an afferent neuron deficit and a lack of commensal-probiotic cells. Herbs are useless to stimulate bile flow with little or no effects on bile production at the liver cell (hepatocyte) level. Learn the secret of how to repolarize the afferent neurons at celiac plexus and how to colonize the gut with 100's of probiotics while RESTORING digestion and ample hepatocyte production of bile.
- **Endocrine Dysregulation** – Learn why HRT makes matters worse by depleting regenerator, anti-inflammatory and fat-burning hormones and why synchronizing the left-right hemispheres of the triune brain can provide your patients with 300% more innate healing power!

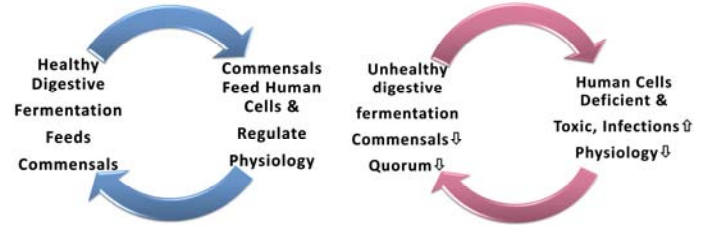

For the first time, you will understand why learning to pinpoint the above issues is the single most important thing you can do in getting your patients well. If you miss any of the above core issues, you are doing symptomatic, anti-infective treatment, stimulatory treatment and immunomodulation which all work against innate healing and reciprocity. Instead, DISCOVER the Hidden Causes of ADD, Anxiety, Depression, Brain Fog, Memory Loss, Obesity, and Fibromyalgia, Alzheimer's, Parkinson's, maldigestion, IBS and more.

## Are you aiming your nutritional efforts at ALL the cells in the body? Did You Know?

- Over 90% of your body's cells are not human cells (they are commensal cells, the "good bacteria"). None of the current nutritional approaches you now employ nourish the commensal cells or allow them to re-colonize the gut after antibiotics or natural anti-infectives....a fact totally ignored by all alternative health practitioners and proven in scientific research. Stop never-ending dysbiosis and candida by restoring the Quorum Symbiotic Cycle and healthy gut fermentation patterns.
- Commensal cells are 800% more intelligent than human cells. Collectively they act like a second brain and comprise 75% of your immune system's power. When healthy and plentiful, they are nutrient factories that pump out miracle nutrients at astounding rates that boost stem cells naturally!
- Neurons need polar lipids and the non-polar lipids found in all today's oils and Omega supplements deplete the vagus efferent pathway increasing inflammation and neurological dysregulation. Nourishing the neurons eliminates the constant need for standard treatments of digestive problems (enzymes, hydrochloric acid, common probiotics) which are harmful in the long run and may help to breakdown foods but end up making it harder to absorb nutrients while making biofilm infections extremely resilient.

### Quorum Symbiotic Cycle    The Dysbiotic Cycle

## Do you want Super-Healing for yourself, your loved ones and your patients?

Regeneration via vagus afferent-efferent reciprocal action is ten times more powerful than stem cell activity. But, no one is nourishing the afferent vagus or knows how to activate this inflowing, inhibitory pathway and today's toxic and stressful world has the afferents under constant restraint. Pollutants and stress over engage the efferents waging war against inflammation-inducing toxicants. Intermediate malfunctions of the afferent vagus don't stop the vagus; they make it less efficient at repairing the damage we inflict upon ourselves. An efferent-afferent imbalance confuses sensations, clouds thoughts, decreases our range of motion, restricting the spine, and forces us into compensatory, abnormal physiology. To fix the deficient afferents, therapy must follow embryonic wisdom and reestablish coherence of the inward centripetal afferents toward the core of the body's inner physician by releasing emotional stress in the limbic brain. **Expand your practice with amazing clinical successes and empowerment gained by treating core clinical issues with nature's timeless wisdom and reciprocity.**
